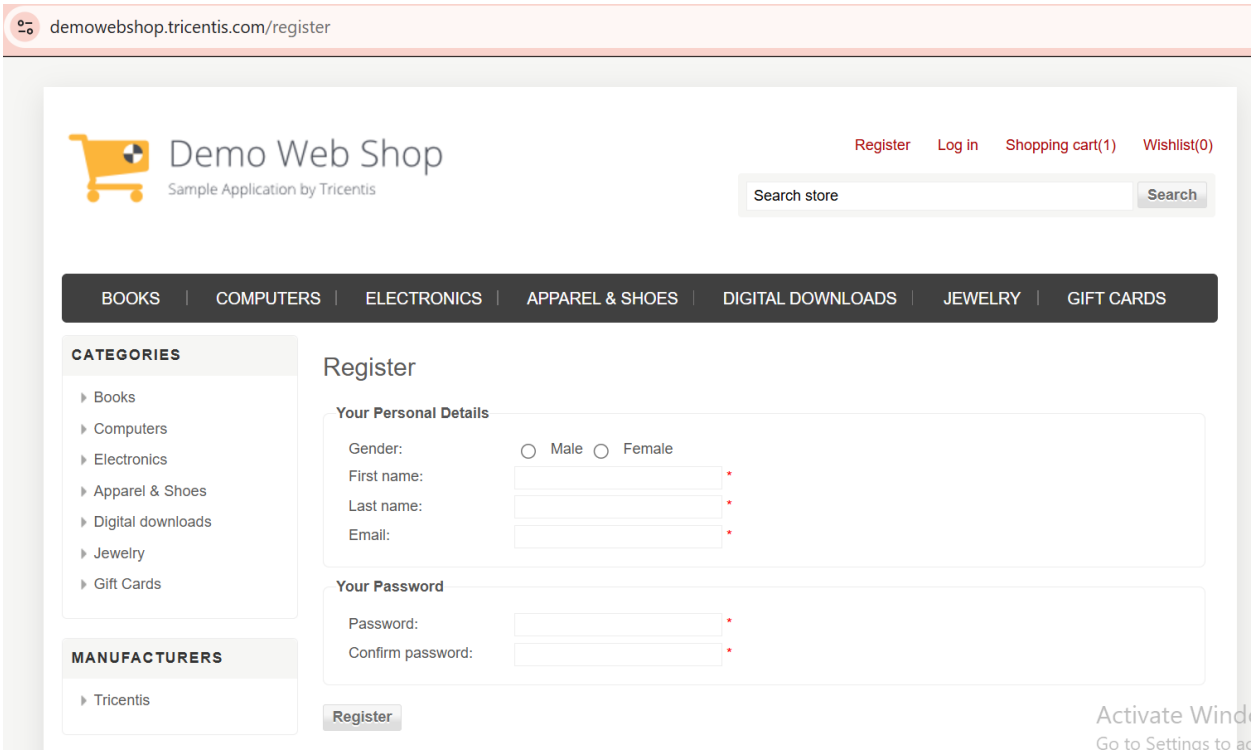
Registration

Registration test cases based exactly on the fields on this page:



<u>Fields on the page:</u>

- **Gender**: Male / Female (radio)
- **First name** (required *)
- **Last name** (required *)
- **Email** (required *)
- **Password** (required *)
- **Confirm password** (required *)
- **Register** button

- **Test Data Sets:** We will be using the following two data sets to define and execute the test cases.

Data Set A (Male)

- Gender: **Male**
- First name: **Kaleem**
- Last name: **Mohammed**
- Email: **kaleem.qa01@gmail.com**
- Password: **Test@12345**
- Confirm password: **Test@12345**

Data Set B (Female)

- Gender: **Female**
- First name: **Emily**
- Last name: **Johnson**
- Email: **emily.johnson.qa01@gmail.com**
- Password: **Test@12345**
- Confirm password: **Test@12345**

✅ Category 1: Positive Scenarios

✅ Registration Test Case 1

- **TC_ID:** R-01
- **Module:** Registration
- **Scenario Type:** Positive
- **Title:** Register successfully with valid details
- **Preconditions:** Email not already registered; user on Register page

Steps:

1. Select **Gender = Male**
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email = kaleem.qa01@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result:

- Registration is successful.
- Confirmation message such as “Your registration completed” is displayed.
- User is redirected to home page or login state as per system behavior.

✅ Registration Test Case 2

- **TC_ID:** R-02
- **Module:** Registration
- **Scenario Type:** Positive
- **Title:** Register successfully with valid details (Female user)
- **Preconditions:** Email used is not already registered.

Steps:

1. Select **Gender = Female**
2. Enter **First name = Emily**
3. Enter **Last name = Johnson**
4. Enter **Email = emily.johnson.qa01@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result:

- Registration is successful.
- Confirmation message such as “Your registration completed” is displayed.
- User is redirected to home page or login state.

✅ Registration Test Case 3

- **TC_ID:** R-03
- **Module:** Registration
- **Scenario Type:** Positive
- **Title:** Register successfully without selecting Gender
- **Preconditions:** Email used is not already registered.

Steps:

1. Do not select Gender
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email** = **kaleem.qa02@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result: Registration is successful and confirmation message is displayed.

✅ Registration Test Case 4

- **TC_ID:** R-04
- **Module:** Registration
- **Scenario Type:** Positive
- **Title:** Register successfully with password containing special characters
- **Preconditions:** Email used is not already registered.

Steps:

1. Select **Gender = Male**
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email = kaleem.qa04@gmail.com**
5. Enter **Password = Test@12345!**
6. Enter **Confirm password = Test@12345!**
7. Click **Register**

Expected Result: Registration is successful and confirmation message is displayed.

✅ Category 2: Negative Scenarios

❌ Registration Test Case 5

- **TC_ID:** R-05
- **Module:** Registration
- **Scenario Type:** Negative
- **Title:** Register with already registered Email
- **Preconditions:** User with Email = **kaleem.qa01@gmail.com** is already registered.

Steps:

1. Select **Gender = Male**
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email = kaleem.qa01@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result: Registration fails and error message is displayed stating that the email already exists.

❌ Registration Test Case 6

- **TC_ID:** R-06
- **Module:** Registration
- **Scenario Type:** Negative
- **Title:** Register with mismatched Password and Confirm password
- **Preconditions:** Email used is not already registered.

Steps:

1. Select **Gender = Female**
2. Enter **First name = Emily**
3. Enter **Last name = Johnson**
4. Enter **Email = emily.johnson.qa03@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@1234**
7. Click **Register**

Expected Result: Registration fails and error message is displayed indicating that the password and confirmation password do not match.

❌ Registration Test Case 7

- **TC_ID:** R-7
- **Module:** Registration
- **Scenario Type:** Negative
- **Title:** Register with Confirm password filled but Password field empty
- **Preconditions:** Email used is not already registered.

Steps:

1. Select **Gender = Male**
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email = kaleem.qa08@gmail.com**
5. Leave **Password** empty
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result: Registration fails and validation message is displayed indicating that Password is required.

❌ Registration Test Case 8

- **TC_ID:** R-08
- **Module:** Registration
- **Scenario Type:** Negative
- **Title:** Register with Email filled but missing domain part
- **Preconditions:** User is on the Registration page.

Steps:

1. Select **Gender = Female**
2. Enter **First name = Emily**
3. Enter **Last name = Johnson**
4. Enter **Email = emily.johnson@**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result:
Registration fails and validation message is displayed indicating the email format is invalid.

✅ Category 3: Validation Scenarios

Registration Test Case 9

- **TC_ID:** R-9
- **Module:** Registration
- **Scenario Type:** Validation
- **Title:** Register with invalid Email format
- **Preconditions:** User is on the Registration page.

Steps:

1. Select **Gender = Male**
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email = kaleem.qa04gmail.com** (missing "@")
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result:
Registration fails and validation message is displayed indicating that the email format is incorrect.

Registration Test Case 10

- **TC_ID:** R-10
- **Module:** Registration
- **Scenario Type:** Validation
- **Title:** Register with empty required fields
- **Preconditions:** User is on the Registration page.

Steps:

1. Do not select **Gender**
2. Leave **First name** empty
3. Leave **Last name** empty
4. Leave **Email** empty
5. Leave **Password** empty
6. Leave **Confirm password** empty
7. Click **Register**

Expected Result:
Registration fails and validation messages are displayed for all required fields indicating that they cannot be empty.

Registration Test Case 11

- **TC_ID:** R-11
- **Module:** Registration
- **Scenario Type:** Validation
- **Title:** Register with First name and last name with only spaces
- **Preconditions:** Email used is not already registered.

Steps:

1. Select **Gender = Male**
2. Enter **First name = " "** (only spaces)
3. Enter **Last name = " "**
4. Enter **Email = kaleem.qa05@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result: Registration fails and validation message is displayed indicating that First name and last name is required.

Registration Test Case 12

- **TC_ID:** R-12
- **Module:** Registration
- **Scenario Type:** Validation
- **Title:** Register with numeric characters in First Name and Last Name fields

Preconditions:
User is on the Registration page.
Assumption: First Name and Last Name fields should contain only alphabetic characters.

Steps:

1. Select **Gender = Male**
2. Enter **First name = 123**
3. Enter **Last name = 456**
4. Enter **Email = kaleem.qa13@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result:
The system should display a validation message indicating that First Name and Last Name must contain only alphabetic characters.

✅ Category 4: Boundary Scenarios

➢ Registration Test Case 13

- **TC_ID:** R-13
- **Module:** Registration
- **Scenario Type:** Boundary
- **Title:** Register with password exactly at minimum allowed length
- **Preconditions:** Minimum password length requirement is 6 characters.

Steps:

1. Select **Gender = Male**
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email = kaleem.qa09@gmail.com**
5. Enter **Password = Abc123** (6 characters)
6. Enter **Confirm password = Abc123**
7. Click **Register**

Expected Result: Registration is successful.

➢ Registration Test Case 14

- **TC_ID:** R-14
- **Module:** Registration
- **Scenario Type:** Boundary
- **Title:** Register with password one character below minimum length

Preconditions: Minimum password length requirement is 6 characters.

Steps:

1. Select **Gender = Male**
2. Enter **First name = Kaleem**
3. Enter **Last name = Mohammed**
4. Enter **Email = kaleem.qa10@gmail.com**
5. Enter **Password = Abc12** (5 characters)
6. Enter **Confirm password = Abc12**
7. Click **Register**

Expected Result:
Registration fails and password length validation message is displayed.

➢ Registration Test Case 15

- **TC_ID:** R-15
- **Module:** Registration
- **Scenario Type:** Boundary
- **Title:** Register with very long First name (maximum allowed length)
- **Preconditions:** User is on Registration page.

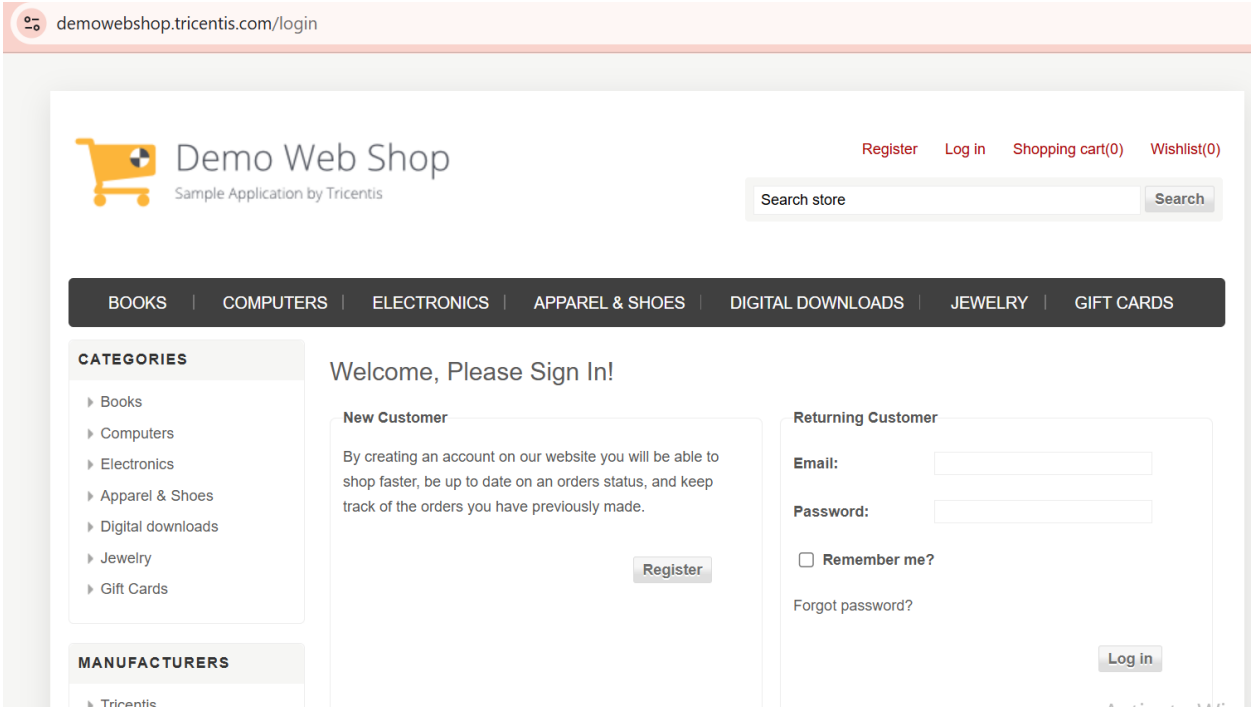
Steps:

1. Select **Gender = Female**
2. Enter **First name = 24 characters**
3. Enter **Last name = Johnson**
4. Enter **Email = emily.johnson.qa06@gmail.com**
5. Enter **Password = Test@12345**
6. Enter **Confirm password = Test@12345**
7. Click **Register**

Expected Result:
System should either:

- Accept the input if within allowed limit, OR
- Show a clear validation message if maximum length exceeded.
  No system crash should occur.

Login



We'll use **your same registered accounts**:

- **Valid User A:** Email = `kaleem.qa01@gmail.com`, Password = `Test@12345`
- **Valid User B:** Email = `emily.johnson.qa01@gmail.com`, Password = `Test@12345`

✅ Category 1: Positive Scenarios

✅ Login Test Case 1 (Positive)

- **TC_ID:** L-01
- **Module:** Login
- **Scenario Type:** Positive
- **Title:** Login successfully with valid credentials (User A)
- **Preconditions:** User A account exists.

Steps:

1. Enter **Email = kaleem.qa01@gmail.com**
2. Enter **Password = Test@12345**
3. Click **Log in**

Expected Result: User is logged in successfully and redirected to the home page.

✅ Login Test Case 2

- **TC_ID:** L-02
- **Module:** Login
- **Scenario Type:** Positive
- **Title:** Login successfully with valid credentials (User B)

Preconditions: User B account exists.

Steps:

1. Enter **Email = emily.johnson.qa01@gmail.com**
2. Enter **Password = Test@12345**
3. Click **Log in**

Expected Result:
User is logged in successfully and redirected to the home page.

✅ Login Test Case 3

- **TC_ID:** L-03
- **Module:** Login
- **Scenario Type:** Positive
- **Title:** Login with “Remember me” checked
- **Preconditions:** User A account exists.

Steps:

1. Enter **Email = kaleem.qa01@gmail.com**
2. Enter **Password = Test@12345**
3. Check **Remember me**
4. Click **Log in**

Expected Result:
User is logged in successfully and redirected to the home page.

✅ Login Test Case 4

- **TC_ID:** L-04
- **Module:** Login
- **Scenario Type:** Positive
- **Title:** “Remember me” keeps user logged in after browser restart
- **Preconditions:** User A account exists.

Steps:

1. Enter **Email = kaleem.qa01@gmail.com**
2. Enter **Password = Test@12345**
3. Check **Remember me**
4. Click **Log in**
5. Close the browser completely
6. Reopen the browser and open the Demo Web Shop website

Expected Result:
User remains logged in (user should not be asked to login again).

✅ Login Test Case 5

- **TC_ID:** L-05
- **Module:** Login
- **Scenario Type:** Positive
- **Title:** Navigate to Forgot Password page
- **Preconditions:** User is on the Login page.

Steps:
1. Click **Forgot password?**

Expected Result:
User is redirected to the password recovery page.

✅ Category 2: Negative Scenarios

❌ Login Test Case 6

- **TC_ID:** L-06
- **Module:** Login
- **Scenario Type:** Negative
- **Title:** Login with valid Email and wrong Password
- **Preconditions:** User A account exists.

Steps:
1. Enter **Email = kaleem.qa01@gmail.com**
2. Enter **Password = Wrong@123**
3. Click **Log in**

Expected Result:
Login fails and an error message is displayed indicating login was unsuccessful.

❌ Login Test Case 7

- **TC_ID:** L-07
- **Module:** Login
- **Scenario Type:** Negative
- **Title:** Login with unregistered Email
- **Preconditions:** Email used is not registered.

Steps:
1. Enter **Email = not.registered.qa01@gmail.com**
2. Enter **Password = Test@12345**
3. Click **Log in**

Expected Result:
Login fails and an error message is displayed indicating login was unsuccessful.

✕ Login Test Case 8

- **TC_ID:** L-08
- **Module:** Login
- **Scenario Type:** Negative
- **Title:** Login with valid Email but Password field contains leading or trailing spaces
- **Preconditions:** User A account exists.

Steps:

1. Enter **Email = kaleem.qa01@gmail.com**
2. Enter **Password = " Test@12345 "** (with spaces before and after)
3. Click **Log in**

Expected Result:
System should either:

- Trim spaces and login successfully, OR
- Reject login with error message.
  In either case, system should behave consistently.

✕ Login Test Case 09

- **TC_ID:** L-09
- **Module:** Login
- **Scenario Type:** Negative
- **Title:** Login with valid Email and password entered in different letter case

Preconditions:
User account exists.

Steps:

1. Enter **Email = kaleem.qa01@gmail.com**
2. Enter **Password = TEST@12345** (different case than the actual password `Test@12345`)
3. Click **Log in**

Expected Result:
Login fails and an error message is displayed indicating login was unsuccessful.

✅ Category 3: Validation Scenarios

⚠️ Login Test Case 10

- **TC_ID:** L-10
- **Module:** Login
- **Scenario Type:** Validation
- **Title:** Login with both Email and Password fields empty
- **Preconditions:** User is on the Login page.

Steps:

1. Leave **Email** empty
2. Leave **Password** empty
3. Click **Log in**

Expected Result:
Login fails and validation messages are displayed indicating required fields must be filled.

⚠️ Login Test Case 11

- **TC_ID:** L-11
- **Module:** Login
- **Scenario Type:** Validation
- **Title:** Login with Email field empty
- **Preconditions:** User is on the Login page.

Steps:

1. Leave **Email** empty
2. Enter **Password = Test@12345**
3. Click **Log in**

Expected Result:
Login fails and validation message is displayed indicating that Email is required.

⚠ Login Test Case 12

- **TC_ID:** L-12
- **Module:** Login
- **Scenario Type:** Validation
- **Title:** Login with Password field empty
- **Preconditions:** User is on the Login page.

Steps:

1. Enter **Email = kaleem.qa01@gmail.com**
2. Leave **Password** empty
3. Click **Log in**

Expected Result:
Login fails and validation message is displayed indicating that Password is required.

⚠ Login Test Case 13

- **TC_ID:** L-13
- **Module:** Login
- **Scenario Type:** Validation
- **Title:** Login with invalid Email format
- **Preconditions:** User is on the Login page.

Steps:

1. Enter **Email = kaleem.qa01gmail.com**
2. Enter **Password = Test@12345**
3. Click **Log in**

Expected Result:
System should display a validation message indicating invalid email format.

✅ Category 4: Boundary Scenarios

Login Test Case 14

- **TC_ID:** L-14
- **Module:** Login
- **Scenario Type:** Boundary
- **Title:** Login with Email containing leading or trailing spaces
- **Preconditions:** User account exists.

Steps:

1. Enter **Email = " kaleem.qa01@gmail.com "** (space before and after)
2. Enter **Password = Test@12345**
3. Click **Log in**

Expected Result:
System should trim spaces and process login normally or show a proper error message.

Login Test Case 15

- **TC_ID:** L-15
- **Module:** Login
- **Scenario Type:** Boundary
- **Title:** Login with Password containing leading or trailing spaces
- **Preconditions:** User account exists.

Steps:

1. Enter **Email = kaleem.qa01@gmail.com**
2. Enter **Password = " Test@12345 "**
3. Click **Log in**

Expected Result:
System should handle the input correctly and either trim spaces or reject login with an error message.
